### Policy Document for Green Campus

A green campus at the college fosters an ideal and conducive environment for the continuous physical and mental growth of the students. The college administration consistently implements solid policies and practical measures to ensure a clean and healthy campus. Numerous programs are also organized to actively involve students in this crucial endeavour. The higher education institution endeavours to shape the youth into responsible citizens while nurturing their aspirations for a promising future. PSB Rajkiya Mahavidyalaya Naughar, Lambgaon, is an exquisite campus nestled amidst nature. The college diligently puts various plans and policies into action to enhance the campus environment, security, and green spaces. These initiatives are as follows:

- Organizing speech, poster competitions, slogan writing competitions etc to make the faculty and students sensitive towards the environment as an effort to make the campus green.
- Collecting and disposing organic and inorganic waste in different dustbins in the college.
- Making campus plastic free by restricting single-use plastic.
- Conducting tree plantation drives, water conservation and cleanliness campaigns in and around the campus.
- The parking area is limited to the main entrance so that the campus remains pollution free.

The college maintains an unwavering dedication towards safeguarding and preserving the environment across all its domains. Several committees, including the Departmental Beautification Committee and Eco Club, have been established to ensure the protection and conservation of the green campus. These committees aim to expand the green areas within the campus and will formulate policies for planning and assessment purposes.
